Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to filters, classified in class 210, subclass 90.
- II. Claims 23-40, drawn to an indicators, classified in class 116, subclass 266.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of collar including the internal passage. The subcombination has separate utility such as a pressure indicator for a fluid reservoir not including a filter element.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Christopher Hunter on 12-9-02 to request an oral election to the above restriction requirement, but did not result in an election being made.
